

Submitting Public Comments on ePlanning Documents (1610-41): Summary

So to summarize what we've done today. We navigated to the NEPA and Land Use Plan registers. We made a comment on a document. We added the contact information. We viewed the submission. And we viewed the confirmation screen.

As a reminder, please be as specific as possible in your comments as it will assist the BLM in improving the planning process.

Also, if available, we would encourage you to use the comment submission form in ePlanning as it will help us better manage the number of comments on a particular issue.

If you need additional assistance with this, feel free to contact the ePlanning team. Our contact information can be found through the ePlanning website. Thank you.
