

Lowden Field Side Channel and Pond Complex - Before

Lowden Field Side Channel and Pond Complex - After

(3) Examples of Engineered Side Channels – The design of the side channels put them at a great risk of failure if they or associated features are disturbed.

(3) Examples of lowered flood plains – Project designs have to ensure that the 100 year flood elevation is not raised. Modification of these features risks raising the 100 flood elevation which puts developments (houses) at risk.
