

Module 1 Lesson 2 – Conducting Action Research

EXERCISE 5 – Review Interim Reclamation Layout and Completion Report

Introduction:

As an environmental/surface inspector, you would review all official documentation (i.e., APD, COAs, Sundries, etc.) during action research before conducting an inspection. For this exercise, we are focusing on the review of the interim reclamation layout and completion report for action research prior to an environmental/surface – interim reclamation (ES-IR) inspection.

Exercise Instructions:

- This is an individual exercise.
- Imagine it is December 15, 2011 and it has been a dry winter with little to no snowfall. You are looking through your cuff record or Excel spreadsheet of wells to inspect in December. You find that you conducted an ES-SD inspection at the Miles 10D1-27-722 well site several months ago. You review your ES-SD inspection documentation and discover that this was the last well to be drilled on this well location. You verify in AFMSS that no other APDs were submitted for this location and that all wells on this well site are in a “producing gas well” (PGW) status.
- You are now planning for an Interim Reclamation (IR) inspection at the well site on BLM-managed land on a Federal lease. Imagine you are conducting action research for this upcoming inspection. You are now at the step in the action research process where you are reviewing the APD interim reclamation layout from the official well file (see attached). You also find the completion report in the official well file (see attached).
- Review the attached interim reclamation layout and completion report.
- Take notes of any items of interest that might be relevant to an upcoming environmental/surface inspection. Items of interest should be items like special COAs or important information to verify compliance during the inspection (i.e., location of certain equipment).
- Also note what date you plan to perform this ES-IR inspection.
- At the next webinar, students will be asked a series of questions related to this exercise.

Attachments:

1. Note Pad (1 page)
 - a. Student can use the first (top) section of the Note Pad to type notes to complete the exercise and reference during the exercise review.
 - b. Student can use the second (bottom) section of the Note Pad to type notes during the exercise review/instructor feedback and reference in the future.
2. Interim Reclamation Layout (1 page)
3. Completion Report (2 pages)

29. Disposition of Gas(Sold, used for fuel, vented, etc.)
SOLD

30. Summary of Porous Zones (Include Aquifers):

Show all important zones of porosity and contents thereof: Cored intervals and all drill-stem tests, including depth interval tested, cushion used, time tool open, flowing and shut-in pressures and recoveries.

31. Formation (Log) Markers

Formation	Top	Bottom	Descriptions, Contents, etc.	Name	Top
					Meas. Depth
				WASATCH FORT UNION LANCE	0 5493 9218

32. Additional remarks (include plugging procedure):

Both zones were tested together rather than separately.

33. Circle enclosed attachments:

- 1. Electrical/Mechanical Logs (1 full set req'd)
- 2. Geologic Report
- 3. DST Report
- 4. Directional Survey
- 5. Sundry Notice for plugging and cement verification
- 6. Core Analysis
- 7 Other:

34. I hereby certify that the foregoing and attached information is complete and correct as determined from all available records (see attached instructions):
