SUBSEQUENT HISTORY: On remand at, Remanded by *Public Citizen v. DOT*, 378 F.3d 958, 2004 U.S. App. LEXIS 16001 (9th Cir., Aug. 4, 2004)

PRIOR HISTORY: ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE NINTH CIRCUIT. *Public Citizen v. DOT*, 316 F.3d 1002, 2003 U.S. App. LEXIS 612 (9th Cir., 2003)

DISPOSITION: Reversed and remanded.

CASE SUMMARY:

PROCEDURAL POSTURE: Respondent organizations petitioned for judicial review, alleging that petitioner Department of Transportation's (DOT) Application and Safety Monitoring Rules (Rules) violated the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C.S. §§ 4321-4370f, and the Clean Air Act (CAA), 42 U.S.C.S. §§ 7401-7671q. The United States Court of Appeals for the Ninth Circuit granted the petitions and set aside the Rules. Certiorari was granted.

OVERVIEW: The President of the United States made clear his intention to lift a moratorium on Mexican motor carrier certification following the preparation of new regulations. The Federal Motor Carrier Safety Administration (FMCSA), an agency within the DOT, issued a programmatic environmental assessment (EA) for the proposed Rules concerning safety regulation of Mexican motor carriers. FMCSA did not consider any environmental impact that could be caused by the increased presence of Mexican trucks within the United States based upon lift-

ing the moratorium. The Court determined that FMCSA did not violate NEPA or the relevant regulations when it did not consider the environmental effect of the increase in cross-border operations of Mexican motor carriers in its EA. Because the President, not FMCSA, could authorize or not authorize cross-border operations from Mexican motor carriers, and because FMCSA had no discretion to prevent the entry of Mexican trucks, its EA did not need to consider the environmental effects arising from the entry. FMCSA did not act improperly by not performing, pursuant to the CAA, a full conformity review analysis for its proposed regulations.

OUTCOME: The United States Supreme Court reversed the judgment of the appellate court and remanded the case for further proceedings.

DECISION:

***60 National Environmental Policy Act of 1969 (42 USCS §§ 4321 et seq.) and Clean Air Act (42 USCS §§ 7401 et seq.) held not to require Federal Motor Carrier Safety Administration to evaluate environmental effects of some cross-border operations by Mexican-domiciled carriers.

SUMMARY:

The National Environmental Policy Act of 1969, as amended (NEPA) (42 USCS §§ 4321 et seq.), generally requires a federal agency to prepare an Environmental Impact Statement (EIS) for a proposed "major Federal action." However, implementing regulations by the Council of Environmental Quality allow a federal agency to prepare a more limited Environmental Assessment (EA) in some situations. If, pursuant to an EA, a federal agency determines that an EIS is not required, then the agency must issue a finding of no significant impact (FONSI).

In addition, under the Clean Air Act, as amended (CAA) (42 USCS §§ 7401 *et seq.*), some safeguards in 42 USCS § 7506(c)(1) are intended to prevent the Federal Government from interfering with the states' abilities to comply with the CAA's requirements. Under implementing regulations by the Environmental Protection Agency, federal agencies (1) must, in many circumstances, undertake a full conformity review with respect to a proposed action; but (2) are exempted if the proposed action would not cause new emissions to exceed certain threshold amounts.

The case at hand involved the promulgation by the Federal Motor Carrier Safety Administration (FMCSA), an agency within the Department of Transportation, of certain application and safety-monitoring regulations that would allow some cross-border operations by Mexican-domiciled motor carriers to occur, where (1) even though 49 USCS § 13902(a)(1) generally mandated that the FMCSA register any qualified motor carrier, a moratorium on new FMCSA grants of operating authority for Mexican-domiciled [***61] motor carriers initially had been imposed, and later had been extended, pursuant to 49 USCS § 10922(l); (2) subsequently, the President of the United States, in asserted fulfillment of the North American Free Trade Agreement (32 ILM 605), had expressed an intention to lift the moratorium; and (3) in May 2001, the FMCSA had initially published for comment the proposed regulations in question.

Congress then enacted § 350 of the Department of Transportation and Related Agencies Appropriations Act, 2002 (note following 49 USCS § 13902), which provided (in conditions later extended to appropriations for fiscal years 2003 and 2004) that no funds appropriated under the 2002 Act could be obligated or expended to review or to process any application by a Mexican-domiciled motor carrier for authority to operate in the interior of the United States until the FMCSA implemented specific application and safety-monitoring requirements for such carriers.

In January 2002, the FMCSA issued a FONSI, which—on the basis of an Environmental Assessment released the same day—concluded that no EIS was needed concerning the proposed regulations. In March 2002, the FMCSA (1) issued the application and safety-monitoring regulations as interim rules with a delayed effective date; and (2) in some accompanying materials, said that a full CAA conformity review was not required. The FMCSA, in its analysis under both NEPA and the CAA, did not consider any emissions attributable to the increased presence of Mexican-domiciled motor carriers within the United States. In November 2002, the President lifted the moratorium on qualified Mexican-domiciled motor carriers.

Meanwhile, however, various challengers had (1) filed

petitions for judicial review of the FMCSA's application and safety-monitoring regulations; and (2) included arguments that these regulations had been promulgated in violation of NEPA and the CAA. In a 2003 decision, the United States Court of Appeals for the Ninth Circuit agreed, granted the petitions, and ordered a remand, as the Court of Appeals expressed the view that (1) the Environmental Assessment was deficient because it failed to give adequate consideration to the overall environmental impact of the moratorium's lifting on the cross-border operations of Mexican-domiciled motor carriers; and (2) the FMCSA's CAA determination was not reliable, for it reflected an "illusory distinction" between (a) the effects of the regulations, and (b) the effects of the President's "rescission" of the moratorium (316 F3d 1002).

On certiorari, the United States Supreme Court reversed and remanded. In an opinion by Thomas, J., expressing the unanimous view of the court, it was held that—under the circumstances presented with respect to the FMCSA's promulgation of regulations that would allow the cross-border operations by Mexican-domiciled motor carriers to occur—neither NEPA nor the CAA required the FMCSA to evaluate the environmental effects of such cross-border operations, because the FMCSA lacked the discretion to prevent such cross-border operations, in view of (1) the FMCSA's general registration mandate in § 13902(a)(1), which mandate could be satisfied consistently with § 350's conditions; and (2) the President's lifting of the moratorium.

ENVIRONMENTAL LAW §3

ENVIRONMENTAL LAW §24

— motor carriers — cross-border operations — National Environmental Policy Act — Clean Air Act

Headnote: [1A] [1B] [1C] [1D] [1E]

Under the circumstances presented with respect to the promulgation by the Federal Motor Carrier Safety Administration (FMCSA) of certain application and safety-monitoring regulations that would allow some cross-border operations by Mexican-domiciled motor carriers to occur, neither the National Environmental Policy Act of 1969, as amended (42 USCS §§ 4321 *et seq.*), nor the Clean Air Act, as amended (42 USCS §§ 7401 *et seq.*), required the FMCSA to evaluate the environmental effects of such cross-border operations, because the FMCSA lacked the discretion to prevent such cross-border operations, in view of:

(1) The FMCSA's general mandate, in 49 USCS § 13902(a)(1), to register any qualified motor carrier, which

mandate could be satisfied consistently with § 350 of the Department of Transportation and Related Agencies Appropriations Act, 2002 (note following 49 *USCS* § 13902), which provided (in conditions later extended to appropriations for fiscal years 2003 and 2004) that no funds appropriated under the 2002 Act could be obligated or expended to review or to process any application by a Mexican-domiciled motor carrier for authority to operate in the interior of the United States until the FMCSA implemented specific application and safety-monitoring requirements for such carriers.

(2) The lifting, by the President of the United States in asserted fulfillment of the North American Free Trade Agreement (32 *ILM* 605), of a moratorium on new FMCSA grants of operating authority for Mexican-domiciled motor carriers.

ENVIRONMENTAL LAW §9

— lack of impact statement — motor carriers — cross-border operations

Headnote:

[2A] [2B] [2C] [2D] [2E] [2F] [2G] [2H] [2I] [2J] [2K]

For purposes of applying the National Environmental Policy Act of 1969, as amended (NEPA) (42 *USCS* §§ 4321 *et seq.*), to the promulgation by the Federal Motor Carrier Safety Administration (FMCSA) of certain application and safety-monitoring regulations that would allow some cross-border operations by Mexican-domiciled motor carriers to occur, the FMCSA's decision—in a no-significant-impact finding, on the basis of the analysis in an Environmental Assessment (EA)—not to prepare an Environmental Impact Statement (EIS) was not shown to have been "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law," within the meaning of 5 *USCS* § 706(2)(A), on the theory that the EA had improperly failed to take into account the environmental effects allegedly resulting from an increase in such cross-border operations, as:

(1) There was not properly before the United States Supreme Court any challenge to the EA due to the EA's allegedly failing to consider adequately possible alternatives to promulgating the regulations.

(2) With respect to the lifting, by the President of the United States in asserted fulfillment of the North American Free Trade Agreement (32 *ILM* 605), of a moratorium on new FMCSA grants of operating authority [***63] for Mexican-domiciled motor carriers, the FMCSA had no ability to countermand the President's lifting of the moratorium or otherwise categorically to exclude Mexican-domiciled motor carriers from operating within the United States.

(3) In these circumstances, the underlying policies behind NEPA and Congress' intent, as informed by NEPA's "rule of reason," made it clear that the causal connection between the FMCSA's issuance of the proposed regulations and the entry of Mexican-domiciled trucks was insufficient to make the FMCSA legally responsible to consider the environmental effects of the entry, for (a) the environmental impact of such cross-border operations would have no effect on the FMCSA's decisionmaking, in that the FMCSA lacked the power to act on whatever information might result; (b) similarly, input from the public could have no impact on the FMCSA's decisionmaking; and (c) an argument that an EIS would be useful for informational purposes entirely outside the FMCSA's decisionmaking process overlooked NEPA's core focus on improving agency decisionmaking.

(5) A "cumulative impact" regulation (40 *CFR* § 1508.7) of the Council of Environmental Quality (a) had been satisfied by the FMCSA, which in its EA had appropriately and reasonably examined the incremental impact of the proposed regulations assuming the President's lifting of the moratorium (and, hence, assuming the increase in cross-border operations of Mexican-domiciled motor carriers); and (b) did not require the FMCSA to treat the moratorium's lifting or its consequences as an effect of the regulations' promulgation.

(6) Some other alleged errors were premised on the incorrect theory that the FMCSA was required to take into account the effects of such an increase in cross-border operations.

[*LEdHN3]**

ENVIRONMENTAL LAW §24

— Clean Air Act — motor carriers — cross-border operations

Headnote: [3A] [3B] [3C] [3D] [3E] [3F]

Under a Clean Air Act (CAA) provision (42 *USCS* § 7506(c)(1)) and the relevant regulations (such as 40 *CFR* §§ 93.150, 93.152 and 93.153) of the Environmental Protection Agency (EPA), the Federal Motor Carrier Safety Administration (FMCSA) did not act improperly by not performing a full conformity-review analysis with respect to the FMCSA's promulgation of certain application and safety-monitoring regulations that would allow some cross-border operations by Mexican-domiciled motor carriers to occur, as:

(1) When the FMCSA evaluated whether it needed to perform a full conformity review, the FMCSA determined that (a) its proposed regulations would not cause emissions to exceed the relevant threshold amounts of emissions, and (b) therefore, the issuance of these regulations would comply with the CAA.

(2) Critical to the FMCSA's calculations was the FMCSA's consideration of only those emissions that would occur from increased roadside inspections of Mexican-domiciled trucks.

(3) The FMCSA did not violate the CAA or the applicable EPA regulations by failing to consider any emissions attributable to the increased presence of Mexican-domiciled trucks within the United States, because—even though the FMCSA's proposed regulations arguably would be "but for" causes of the entry of such trucks into the United States—such emissions by Mexican-domiciled [***64] trucks were neither "direct" nor "indirect" emissions that would be caused by the FMCSA's issuance of the proposed regulations, for:

(a) As to "direct," such truck emissions would not occur at the same time or at the same place as the promulgation of the FMCSA's regulations.

(b) As to "indirect," the FMCSA could not practically control, nor would the FMCSA maintain control, over such truck emissions, where the FMCSA (i) did not have the ability to countermand the lifting, by the President of the United States in asserted fulfillment of the North American Free Trade Agreement (32 *ILM* 605), of a moratorium on new FMCSA grants of operating authority for Mexican-domiciled motor carriers; and (ii) could not act categorically to prevent Mexican-domiciled carriers from being registered or Mexican-domiciled trucks from entering the United States.

[***LEdHN4]

MOTOR VEHICLES AND CARRIERS §15

MOTOR VEHICLES AND CARRIERS §19

— cross-border operations — safety — registration

Headnote: [4A] [4B] [4C] [4D] [4E] [4F]

With respect to the lifting, by the President of the United States in asserted fulfillment of the North American Free Trade Agreement (32 *ILM* 605), of a prior moratorium on new grants, by the Federal Motor Carrier Safety Administration (FMCSA), of operating authority for Mexican-domiciled motor carriers—which moratorium initially had been imposed, and later had been extended, pursuant to 49 USCS § 10922(l)—the FMCSA had no ability to countermand the President's lifting of the moratorium or otherwise categorically to exclude Mexican-domiciled motor carriers from operating within the United States, as:

(1) Under the "entirely reasonable" reading by the FMCSA, an agency within the Department of Transportation (DOT), of the FMCSA's general registration mandate in 49 USCS § 13902(a)(1), the FMCSA had to certify any motor carrier that could show that the carrier

was willing and able to comply with various substantive requirements for safety and financial responsibility that were contained in DOT regulations.

(2) Even though § 350 of the Department of Transportation and Related Agencies Appropriations Act, 2002 (note following 49 USCS § 13902), restricted the FMCSA's ability to authorize cross-border operations of Mexican-domiciled motor carriers—by providing (in conditions later extended to appropriations for fiscal years 2003 and 2004) that no funds appropriated under the 2002 Act could be obligated or expended to review or to process any application by a Mexican-domiciled motor carrier for authority to operate in the interior of the United States until the FMCSA implemented specific application and safety-monitoring requirements for such carriers—§ 350 did not otherwise modify FMCSA's statutory mandates, including the mandate in § 13902(a)(1).

(3) Thus, (a) the FMCSA had been prevented from registering Mexican-domiciled motor carriers by only the moratorium; and (b) upon the moratorium's lifting, if the FMCSA refused to authorize a Mexican-domiciled motor carrier for cross-border services, then the FMCSA would violate § 13902(a)(1) where the carrier was willing and able to comply with the various substantive [***65] safety and financial-responsibility rules.

(4) There was no irreconcilable conflict between § 13902(a)(1) and the later-enacted § 350, for the FMCSA could satisfy both mandates, by (a) issuing the application and safety-inspection rules required by § 350; (b) starting to process applications by Mexican-domiciled motor carriers; and (c) authorizing those carriers that satisfied § 13902(a)(1)'s conditions.

[***LEdHN5]

ENVIRONMENTAL LAW §3

— National Environmental Policy Act

Headnote: [5]

The National Environmental Policy Act of 1969, as amended (NEPA) (42 USCS §§ 4321 *et seq.*), does not mandate particular results in order to accomplish NEPA's ends of (1) reducing or eliminating environmental damage, and (2) promoting the understanding of the ecological systems and natural resources important to the United States. Rather, NEPA imposes only procedural requirements on federal agencies, with a particular focus on requiring agencies to undertake analyses of the environmental impact of the agencies' proposals and actions.

[***LEdHN6]

ENVIRONMENTAL LAW §24

— Clean Air Act

Headnote: [6]

Some safeguards in a provision of the Clean Air Act, as amended (CAA) (*42 USCS § 7506(c)(1)*)—which prohibit the Federal Government and its agencies from engaging in, supporting in any way or providing financial assistance for, licensing or permitting, or approving, any activity which does not conform to a state's implementation plan—are intended to prevent the Federal Government from interfering with the states' abilities to comply with the CAA's requirements.

[***LEdHN7]

ENVIRONMENTAL LAW §8

— federal agency

Headnote: [7]

While the Federal Motor Carrier Safety Administration (FMCSA), an agency within the Department of Transportation, has a variety of federal statutory mandates, the FMCSA has no federal statutory authority (1) to impose or enforce emissions controls, or (2) to establish environmental requirements unrelated to motor-carrier safety.

[***LEdHN8]

ENVIRONMENTAL LAW §18

— scope of judicial review — issue not properly before court

Headnote: [8A] [8B]

For purposes of the United States Supreme Court's review under the National Environmental Policy Act of 1969, as amended (*42 USCS §§ 4321 et seq.*), of a decision by the Federal Motor Carrier Safety Administration (FMCSA) in a no-significant-impact finding, on the basis of the analysis in an Environmental Assessment (EA)—where the FMCSA had decided not to prepare an Environmental Impact Statement (EIS) with respect to the promulgation of certain application and safety-monitoring regulations that would allow some cross-border operations by Mexican-domiciled motor carriers to occur—there was not properly before the Supreme Court any challenge to the EA due to the EA's allegedly failing to consider adequately possible alternatives (to promulgating the regulations) that would mitigate the environmental impact of the authorization of such cross-border operations, as:

(1) The FMCSA's challengers had forfeited any objection to the EA on this ground, for (a) none of the challengers had (i) identified in their comments any rule-making alternatives [***66] beyond those evaluated in the EA, or (ii) urged the FMCSA to consider alternatives; and (b) thus, the FMCSA had not been given the opportunity to examine any proposed alternatives to determine

if they were reasonably available.

(2) The case at hand did not present a situation in which an EA's or an EIS's flaws might be so obvious that there might be no need for a commentator to point the flaws out specifically in order to preserve the ability to challenge a proposed action, for (a) with respect to the FMCSA's ability to mitigate, the challengers could properly argue only that the FMCSA could regulate emissions from Mexican-domiciled trucks indirectly, by (i) making the safety-registration process more onerous, or (ii) removing older more-polluting trucks through more effective enforcement of motor-carrier safety standards; (b) the challengers had failed to identify any evidence that showed that any effect from these possible actions would be significant, or even noticeable, for air-quality purposes; (c) the connection between enforcement of motor-carrier safety and the environmental harms alleged was tenuous at best; and (d) it was not clear that the FMCSA could, consistent with its limited statutory mandates, reasonably impose on Mexican-domiciled motor carriers standards beyond those already required in the FMCSA's proposed regulations.

[***LEdHN9]

ENVIRONMENTAL LAW §15

— challengers' participation

Headnote: [9]

Persons challenging a federal agency's compliance with the National Environmental Policy Act of 1969, as amended (*42 USCS §§ 4321 et seq.*), must structure their participation so that it alerts the agency to the persons' position and contentions, in order to allow the agency to give the issue meaningful consideration.

[***LEdHN10]

ENVIRONMENTAL LAW §3

— National Environmental Policy Act

Headnote: [10]

A federal agency bears the primary responsibility to ensure that the agency complies with the National Environmental Policy Act of 1969, as amended (*42 USCS §§ 4321 et seq.*).

[***LEdHN11]

ENVIRONMENTAL LAW §3

— National Environmental Policy Act

Headnote: [11A] [11B]

Under the National Environmental Policy Act of 1969, as amended (NEPA) (*42 USCS §§ 4321 et seq.*), and the relevant regulations of the Council of Environmental Quality (such as *40 CFR §§ 1501.4, 1508.9, and 1508.13*), a "but for" causal relationship is insufficient to make a

federal agency responsible for a particular environmental effect. Instead, NEPA requires a reasonably close causal relationship between the environmental effect and the alleged cause. In particular, courts must look to the underlying policies or legislative intent in order to draw a manageable line between (1) those causal changes that may make an actor responsible for an effect, and (2) those that do not. Where an agency has no ability to prevent a certain effect due to the agency's limited statutory authority over the relevant actions, the agency cannot be considered a legally relevant "cause" of the effect. Thus, under NEPA and the implementing regulations, the agency need not consider such effects in determining whether an agency action is a "major Federal action" within the meaning of a NEPA provision (42 USCS § 4332(2)(C)). [***67]

[***LEdHN12]

ENVIRONMENTAL LAW §9

— impact statement — rule of reason

Headnote: [12]

Inherent in the National Environmental Policy Act of 1969, as amended (NEPA) (42 USCS §§ 4321 *et seq.*), and its implementing regulations (such as 40 CFR §§ 1500.1(b)-(c)) is a "rule of reason," which ensures that federal agencies determine whether and to what extent to prepare an Environmental Impact Statement (EIS) on the basis of the usefulness of any new potential information to the decisionmaking process. Thus, where the preparation of an EIS would serve no purpose in light of NEPA's regulatory scheme as a whole, no rule of reason worthy of that title would require an agency to prepare an EIS.

[***LEdHN13]

ENVIRONMENTAL LAW §9

— impact statement — purposes

Headnote: [13A] [13B]

Under the National Environmental Policy Act of 1969, as amended (42 USCS §§ 4321 *et seq.*), the requirement for a federal agency, in certain circumstances, to prepare an Environmental Impact Statement (EIS) serves the purposes of (1) ensuring that the agency, in reaching its decision, will have available, and will carefully consider, detailed information concerning significant environmental impacts; and (2) guaranteeing that the relevant information will be made available to the larger audience that may also play a role in both the decisionmaking process and the implementation of that decision. Also, the informational role of an EIS is (1) to give the public the assurance that the agency has indeed considered environmental concerns in the agency's decisionmaking process; and (2) perhaps more significantly, to provide a springboard for public comment in the agency decisionmaking process itself. The purpose of the informational role is

to ensure that the larger audience can provide input as necessary to the agency making the relevant decisions.

[***LEdHN14]

STATUTES §136

— re-enactment of different provision

Headnote: [14A] [14B]

Congress did not ratify a Federal Court of Appeals' interpretation of some transportation-related issues under the National Environmental Policy Act of 1969, as amended (NEPA) (42 USCS §§ 4321 *et seq.*), and the Clean Air Act, as amended (CAA) (42 USCS §§ 7401 *et seq.*), when Congress, after the Court of Appeals' decision, re-enacted a prior restriction in § 350 of the Department of Transportation and Related Agencies Appropriations Act, 2002 (note following 49 USCS § 13902), in two later appropriations statutes, as (1) the case at hand involved the interpretation of NEPA and the CAA, not § 350; and (2) § 350's precise requirements (a) had not been in dispute before the Court of Appeals, and (b) were not later in dispute before the United States Supreme Court. Thus, the congressional re-enactment of § 350 told the Supreme Court nothing about Congress' view as to the requirements of NEPA and the CAA, and so, on the legal issues involved in the case at hand, Congress had been entirely silent.

[***LEdHN15]

STATUTES §136

— re-enactment

Headnote: [15A] [15B]

The doctrine of ratification states that Congress is presumed to be aware of a judicial interpretation of a federal statute and to adopt that interpretation when Congress re-enacts a statute without change. [***68]

[***LEdHN16]

ENVIRONMENTAL LAW §24

— Clean Air Act — causation

Headnote: [16]

For purposes of evaluating causation in the conformity-review process under a Clean Air Act (CAA) provision (42 USCS § 7506(c)(1)), in which process a federal agency must, in many circumstances, determine whether a proposed action of the agency is in conformity with the CAA—and, in particular, an agency is required by a rule of the Environmental Protection Agency (EPA) (40 CFR § 93.153(b)) to determine whether certain pollutant emissions caused by a federal action would equal or exceed threshold levels established by the EPA—some sort of "but for" causation is sufficient with respect to a federal action, where (1) the EPA's regulations have defined the

term "[c]aused by"; and (2) in particular, under 40 CFR § 93.152, emissions are "[c]aused by" a federal action if the emissions would not occur in the absence of the federal action. [***69]

SYLLABUS: *The National Environmental Policy Act of 1969*

(NEPA) requires federal agencies to analyze the environmental impact of their proposals and actions in an Environmental Impact Statement (EIS), but Council of Environmental Quality (CEQ) regulations allow an agency to prepare a more limited Environmental Assessment (EA) if the agency's proposed action neither is categorically excluded from the EIS production requirement nor would clearly require production of an EIS. An agency that decides, pursuant to an EA, that no EIS is required must issue a "finding of no significant impact" (FONSI). *The Clean Air Act* (CAA) leaves States to develop "implementation plans" to comply with national air quality standards mandated by the Act, and requires federal agencies' actions to "conform" to those state plans, 42 U.S.C. § 7506(c)(1) [42 USCS § 7506(c)(1)]. In 1982, Congress enacted a moratorium, prohibiting, *inter alia*, Mexican motor carriers from obtaining operating authority within the United States and authorizing the President to lift the moratorium. In 2001, the President announced his intention to lift the moratorium once new regulations were prepared to grant operating authority to Mexican motor carriers. The Federal Motor Carrier Safety Administration (FMCSA) published one proposed rule addressing the application form for such carriers and another addressing the establishment of a safety-inspection regime for carriers receiving operating authority. Congress subsequently provided, in § 350 of a DOT appropriations Act, that no funds appropriated could be obligated or expended to review or process any Mexican motor carrier's applications until FMCSA implemented specific application and safety-monitoring requirements. Acting pursuant to NEPA, FMCSA issued an EA for its proposed rules. The EA did not consider the environmental impact that [***70] might be caused by the increased presence of Mexican trucks in the United States, concluding that any such impact would be an effect of the moratorium's modification, not the regulations' implementation. Concluding that the regulations' issuance would have no significant environmental impact, FMCSA issued a FONSI. In subsequent interim rules, FMCSA relied on the EA and FONSI to demonstrate compliance with NEPA, and determined that any emissions increase from the regulations would fall below the Environmental Protection Agency's (EPA) threshold levels needed to trigger a conformity review under the CAA. Before the moratorium was lifted, respondents sought judicial review of

the proposed rules, arguing that their promulgation violated NEPA and the CAA. The Court of Appeals agreed, finding the EA deficient because it did not consider the environmental impact of lifting the moratorium, when that action was reasonably foreseeable at the time FMCSA prepared the EA and directing FMCSA to prepare an EIS and a full CAA conformity determination for the regulations.

Held:

Because FMCSA lacks discretion to prevent cross-border operations of Mexican motor carriers, neither NEPA nor the CAA requires FMCSA to evaluate the environmental effects of such operations.

(a) FMCSA did not violate NEPA or the relevant CEQ regulations.

(1) An agency's decision not to prepare an EIS can be set aside only if it is arbitrary and capricious, see 5 U.S.C. § 706(2)(A) [5 USCS § 706(2)(A)]. Respondents argue that the issuance of a FONSI was arbitrary and capricious because the EA did not take into account the environmental effects of an increase in cross-border operations of Mexican motor carriers. The relevant question, under NEPA, is whether that increase, and the correlative release of emissions, is an "effect," 40 CFR § 1508.8, of FMCSA's rules; if not, FMCSA's failure to address these effects in the EA did not violate NEPA, and the FONSI's issuance cannot be arbitrary and capricious.

(2) Respondents have forfeited any objection to the EA on the ground that it did not adequately discuss potential alternatives to the proposed action because respondents never identified in their comments to the rules any alternatives beyond those the EA evaluated.

(3) Respondents argue that the EA must take the increased cross-border operations' environmental effects into account because § 350's expenditure bar makes it impossible for any Mexican truck to operate in the United States until the regulations are issued, and hence the trucks' entry is a "reasonably foreseeable" indirect effect of the issuance of the regulations. 40 CFR § 1508.8. Critically, that argument overlooks FMCSA's inability to countermand the President's lifting of the moratorium or otherwise categorically to exclude Mexican trucks from operating in the United States. While § 350 restricted FMCSA's ability to authorize such operations, FMCSA remains subject to 49 U.S.C. § 13902(a)(1)'s [49 USCS § 13902(a)(1)'s] mandate that it register any motor carrier willing and able to comply with various safety and financial responsibility rules. Only the moratorium prevented it from doing so for Mexican trucks before 2001. Respondents must rest on "but for" causation, where an agency's action is considered a cause [***71] of an en-

541 U.S. 752, *; 124 S. Ct. 2204, **;
159 L. Ed. 2d 60, ***71; 2004 U.S. LEXIS 4027

vironmental effect even when the agency has no authority to prevent the effect. However, "but for" causation is insufficient to make an agency responsible for a particular effect under NEPA and the relevant regulations. NEPA requires a "reasonably close causal relationship" akin to proximate cause in tort law. *Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 774, 75 L. Ed. 2d 534, 103 S. Ct. 1556. Also, inherent in NEPA and its implementing regulations is a "rule of reason," which ensures that agencies determine whether and to what extent to prepare an EIS based on the usefulness of any new potential information to the decisionmaking process. The underlying policies behind NEPA and Congress' intent, as informed by the "rule of reason," make clear that the causal connection between the proposed regulations and the entry of Mexican trucks is insufficient to make FMCSA responsible under NEPA to consider the environmental effects of entry. Neither of the purposes of NEPA's EIS requirement—to ensure both that an agency has information to make its decision and that the public receives information so it might also play a role in the decisionmaking process—will be fulfilled by requiring FMCSA to consider the environmental impact at issue. Since FMCSA has no ability to prevent such cross-border operations, it lacks the power to act on whatever information might be contained in an EIS and could not act on whatever input the public could provide. This analysis is not changed by the CEQ regulation requiring an agency to evaluate the "cumulative impact" of its action, 40 CFR § 1508.7, since that rule does not require FMCSA to treat the lifting of the moratorium itself or the consequences from that lifting as an effect of its rules promulgation.

(b) FMCSA did not act improperly by not performing a full conformity analysis pursuant to the CAA and relevant regulations. To ensure that its actions are consistent with 42 USC § 7506 [42 USCS § 7506], a federal agency must undertake "a conformity determination . . . where the total of direct and indirect emissions in a nonattainment or maintenance area caused by [the] action would equal or exceed" certain threshold levels established by the EPA. 40 CFR § 93.153(b). "Direct emissions" "are caused or initiated by the Federal action and occur at the same time and place as the action," § 93.152; and "indirect emissions" are "caused by the Federal action" but may occur later in time, and may be practicably controlled or maintained by the federal agency, *ibid*. Some sort of "but for" causation is sufficient for evaluating causation in the conformity review process. See *ibid*. Because it excluded emissions attributable to the increased presence of Mexican trucks within the United States, FMCSA concluded that its regulations would not exceed EPA thresholds. Although arguably FMCSA's proposed regulations would be "but for" causes of the entry of Mexican trucks

into the United States, such trucks' emissions are not "direct" because they will not occur at the same time or place as the promulgation of the regulations. And they are not "indirect" because FMCSA cannot practicably control or maintain control over the emissions: FMCSA has no ability to countermand the President's decision to lift [***72] the moratorium or to act categorically to prevent Mexican carriers from registering and Mexican trucks from entering the country; and once the regulations are promulgated, FMCSA will not be able to regulate any aspect of vehicle exhaust from those trucks. 316 F.3d 1002

, reversed and remanded.

COUNSEL:

Edwin S. Kneedler argued the cause for petitioners.

Jonathan Weissglass argued the cause for respondents.

JUDGES: Thomas, J., delivered the opinion for a unanimous Court.

OPINIONBY: THOMAS

OPINION: [***756] [**2209] Justice **Thomas** delivered the opinion of the Court.

[***LEdHR1A] [1A] [***LEdHR2A] [2A] [***LEdHR3A] [3A] [***LEdHR4A] [4A] In this case, we confront the question whether the National Environmental Policy Act of 1969 (NEPA), 83 Stat 852 (codified, as amended, at 42 U.S.C. §§ 4321–4370f) [42 USCS §§ 4321–4370f], and the Clean Air Act (CAA), 42 U.S.C. §§ 7401–7671q [42 USCS §§ 7401–7671q], require the Federal Motor Carrier Safety Administration (FMCSA) to evaluate the environmental effects of cross-border operations of Mexican-domiciled motor carriers, where FMCSA's promulgation of certain regulations would allow such cross-border operations to occur. Because FMCSA lacks discretion to prevent these cross-border operations, we conclude that these statutes impose no such requirement on FMCSA.

I

Due to the complex statutory and regulatory provisions implicated in this case, we begin with a brief overview of the relevant statutes. We then turn to the factual and procedural background.

A

1

[***LEdHR5] [5] Signed into law on January 1, 1970, NEPA establishes a "national policy [to] encourage

541 U.S. 752, *756; 124 S. Ct. 2204, **2209;
159 L. Ed. 2d 60, ***LEdHR5; 2004 U.S. LEXIS 4027

productive and enjoyable harmony between man and his environment," and was intended to reduce or eliminate environmental damage and to promote "the understanding of the ecological systems and natural resources important to" the United States. 42 U.S.C. § 4321 [42 USCS § 4321]. "NEPA itself does not mandate particular results" in order to accomplish these ends. *Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 350, 104 L. Ed. 2d 351, 109 S. Ct. 1835 (1989). Rather, NEPA imposes only procedural requirements on federal agencies with a particular focus on requiring agencies to undertake analyses [*757] of the environmental impact of their proposals and actions. See *id.*, at 349-350, 104 L. Ed. 2d 351, 109 S. Ct. 1835. At the heart of NEPA is a requirement that federal agencies

"include in every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on—(i) the environmental impact of the proposed action, (ii) any adverse environmental effects which cannot be avoided should the proposal be implemented, (iii) alternatives to the proposed action, (iv) the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and (v) any irreversible and irretrievable commitments of resources which would be involved [*73] in the proposed action should it be implemented." 42 U.S.C. § 4332(2)(C) [42 USCS § 4332(2)(C)].

This detailed statement is called an Environmental Impact Statement (EIS). The Council of Environmental Quality (CEQ), established by NEPA with authority to issue regulations interpreting it, has promulgated regulations to guide federal agencies in determining what actions are subject to that statutory requirement. See 40 CFR § 1500.3 (2003). The CEQ regulations allow an agency to prepare a more limited document, an Environmental [*2210] Assessment (EA), if the agency's proposed action neither is categorically excluded from the requirement to produce an EIS nor would clearly require the production of an EIS. See §§ 1501.4(a)-(b). The EA is to be a "concise public document" that "[b]riefly provide[s] sufficient evidence and analysis for determining whether to prepare an [EIS]." § 1508.9(a). If, pursuant to the EA, an agency determines that an EIS is not required under applicable CEQ regulations, it must issue a "finding of no significant impact" (FONSI), which briefly presents [*758] the reasons why the proposed agency action will not have a significant impact on the human environment.

See §§ 1501.4(e), 1508.13.

2

[***LEdHR6] [6] What is known as the CAA became law in 1963, 77 Stat 393. In 1970, Congress substantially amended the CAA into roughly its current form. 84 Stat 1713. The 1970 amendments mandated national air quality standards and deadlines for their attainment, while leaving to the States the development of "implementation plan[s]" to comply with the federal standards. *Ibid.*

In 1977, Congress again amended the CAA, 91 Stat 749, to prohibit the Federal Government and its agencies from "engag[ing] in, support[ing] in any way or provid[ing] financial assistance for, licens[ing] or permit[ing], or approv[ing], any activity which does not conform to [a state] implementation plan." 42 U.S.C. § 7506(c)(1) [42 USCS § 7506(c)(1)]. The definition of "conformity" includes restrictions on, for instance, "increas[ing] the frequency or severity of any existing violation of any standard in any area," or "delay[ing] timely attainment of any standard . . . in any area." § 7506(c)(1)(B). These safeguards prevent the Federal Government from interfering with the States' abilities to comply with the CAA's requirements.

3

[***LEdHR4B] [4B] [***LEdHR7] [7] FMCSA, an agency within the Department of Transportation (DOT), is responsible for motor carrier safety and registration. See 49 U.S.C. § 113(f) [49 USCS § 113(f)]. FMCSA has a variety of statutory mandates, including "ensur[ing]" safety, § 31136, establishing minimum levels of financial responsibility for motor carriers, § 31139, and prescribing federal standards for safety inspections of commercial motor vehicles, § 31142. Importantly, FMCSA has only limited discretion regarding motor vehicle carrier registration: It must grant registration to all domestic or foreign motor carriers [*759] that are "willing and able to comply with" the applicable safety, fitness, and financial-responsibility requirements. § 13902(a)(1). FMCSA has no statutory authority to impose or enforce emissions controls or to establish [*74] environmental requirements unrelated to motor carrier safety.

B

We now turn to the factual and procedural background of this case. Before 1982, motor carriers domiciled in Canada and Mexico could obtain certification to operate within the United States from the Interstate Commerce Commission (ICC). n1 In 1982, Congress, concerned about discriminatory treatment of United States motor carriers in Mexico and Canada, enacted a 2-year morato-

541 U.S. 752, *759; 124 S. Ct. 2204, **2210;
159 L. Ed. 2d 60, ***74; 2004 U.S. LEXIS 4027

rium on new grants of operating authority. Congress authorized [**2211] the President to extend the moratorium beyond the 2-year period if Canada or Mexico continued to interfere with United States motor carriers, and also authorized the President to lift or modify the moratorium if he determined that doing so was in the national interest. 49 U.S.C. § 10922(l) (1982 ed.) [49 USCS § 10922(l)]. Although the moratorium on Canadian motor carriers was quickly lifted, the moratorium on Mexican motor carriers remained, and was extended by the President.

n1 In 1995, Congress abolished the ICC and transferred most of its responsibilities to the Secretary of Transportation. See *ICC Termination Act of 1995*, § 101, 109 Stat 803. In 1999, Congress transferred responsibility for motor carrier safety within DOT to the newly created FMCSA. See *Motor Carrier Safety Improvement Act of 1999*, 113 Stat 1748.

In December 1992, the leaders of Mexico, Canada, and the United States signed the *North American Free Trade Agreement (NAFTA)*, 32 I. L. M. 605 (1993). As part of NAFTA, the United States agreed to phase out the moratorium and permit Mexican motor carriers to obtain operating authority within the United States' interior by January 2000. On NAFTA's effective date (January 1, 1994), the President began to lift the trade moratorium by allowing the licensing [*760] of Mexican carriers to provide some bus services in the United States. The President, however, did not continue to ease the moratorium on the timetable specified by NAFTA, as concerns about the adequacy of Mexico's regulation of motor carrier safety remained.

The Government of Mexico challenged the United States' implementation of NAFTA's motor carrier provisions under NAFTA's dispute-resolution process, and in February 2001, an international arbitration panel determined that the United States' "blanket refusal" of Mexican motor carrier applications breached the United States' obligations under NAFTA. App. 279, P 295. Shortly thereafter, the President made clear his intention to lift the moratorium on Mexican motor carrier certification following the preparation of new regulations governing grants of operating authority to Mexican motor carriers.

In May 2001, FMCSA published for comment proposed rules concerning safety regulation of Mexican motor carriers. One rule (the Application Rule) addressed the establishment of a new application form for Mexican motor carriers that seek authorization to operate within the United States. Another rule (the Safety Monitoring Rule) addressed the establishment of a safety-inspection

regime for all Mexican motor carriers that would receive operating authority under the Application Rule.

In December 2001, Congress enacted the Department of Transportation and Related Agencies Appropriations Act, 2002, 115 Stat 833. Section 350 of this Act, *id.*, at 864, provided that no funds appropriated under the Act could be obligated or expended to review or to process any application by a Mexican motor carrier for authority to operate in the interior of the United States until FMCSA implemented specific application and safety-monitoring requirements for Mexican carriers. Some of these requirements went beyond those proposed by FMCSA in the Application and Safety [*761] Monitoring Rules. Congress extended the § 350 conditions to appropriations for Fiscal Years 2003 and 2004.

In January 2002, acting pursuant to NEPA's mandates, FMCSA issued a programmatic EA for the proposed Application and Safety Monitoring Rules. FMCSA's EA evaluated the environmental impact associated with three separate scenarios: where the President did not lift the moratorium; where the President did but where (contrary to what was legally possible) FMCSA did not issue any new regulations; and the Proposed Action Alternative, where the President would modify the moratorium and where FMCSA would adopt the proposed regulations. The EA considered the environmental impact in the categories of traffic and congestion, public safety and health, air quality, [**2212] noise, socioeconomic factors, and environmental justice. Vital to the EA's analysis, however, was the assumption that there would be no change in trade volume between the United States and Mexico due to the issuance of the regulations. FMCSA did note that § 350's restrictions made it impossible for Mexican motor carriers to operate in the interior of the United States before FMCSA's issuance of the regulations. But, FMCSA determined that "this and any other associated effects in trade characteristics would be the result of the modification of the moratorium" by the President, not a result of FMCSA's implementation of the proposed safety regulations. App. 60. Because FMCSA concluded that the entry of the Mexican trucks was not an "effect" of its regulations, it did not consider any environmental impact that might be caused by the increased presence of Mexican trucks within the United States.

The particular environmental effects on which the EA focused, then, were those likely to arise from the increase in the number of roadside inspections of Mexican trucks and buses due to the proposed regulations. The EA concluded that these effects (such as a slight increase in emissions, noise from the trucks, and possible danger to passing motorists) [*762] were minor and could be addressed and avoided in the inspections process itself.

541 U.S. 752, *762; 124 S. Ct. 2204, **2212;
159 L. Ed. 2d 60, ***74; 2004 U.S. LEXIS 4027

The EA also noted that the increase of inspection-related emissions would be at least partially offset by the fact that the safety requirements would reduce the number of Mexican trucks operating in the United States. Due to these calculations, the EA concluded that the issuance of the proposed regulations would have no significant impact on the environment, and hence FMCSA, on the same day as it released the EA, issued a FONSI.

On March 19, 2002, FMCSA issued the two interim rules, delaying their effective date until May 3, 2002, to allow public comment on provisions that FMCSA added to satisfy the requirements of § 350. In the regulatory preambles, FMCSA relied on its EA and its FONSI to demonstrate [***76] compliance with NEPA. FMCSA also addressed the CAA in the preambles, determining that it did not need to perform a "conformity review" of the proposed regulations under 42 U.S.C. § 7506(c)(1) [42 USCS § 7506(c)(1)] because the increase in emissions from these regulations would fall below the Environmental Protection Agency's (EPA's) threshold levels needed to trigger such a review.

In November 2002, the President lifted the moratorium on qualified Mexican motor carriers. Before this action, however, respondents filed petitions for judicial review of the Application and Safety Monitoring Rules, arguing that the rules were promulgated in violation of NEPA and the CAA. The Court of Appeals agreed with respondents, granted the petitions, and set aside the rules. 316 F.3d 1002 (CA9 2003).

The Court of Appeals concluded that the EA was deficient because it failed to give adequate consideration to the overall environmental impact of lifting the moratorium on the cross-border operation of Mexican motor carriers. According to the Court of Appeals, FMCSA was required to consider the environmental effects of the entry of Mexican trucks because "the President's rescission of the moratorium was 'reasonably foreseeable' at the time the EA was prepared [***763] and the decision not to prepare an EIS was made." *Id.*, at 1022 (quoting 40 CFR §§ 1508.7, 1508.8(b) (2003)). Due to this perceived deficiency, the Court of Appeals remanded the case for preparation of a full EIS.

[**2213] The Court of Appeals also directed FMCSA to prepare a full CAA conformity determination for the challenged regulations. It concluded that FMCSA's determination that emissions attributable to the challenged rules would be below the threshold levels was not reliable because the agency's CAA determination reflected the "illusory distinction between the effects of the regulations themselves and the effects of the presidential rescission of the moratorium on Mexican truck entry." 316 F.3d at 1030.

We granted certiorari, 540 U.S. ___, 540 U.S. 1088, 157 L. Ed. 2d 793, 124 S. Ct. 957 (2003), and now reverse.

II

[***LEdHR2B] [2B] An agency's decision not to prepare an EIS can be set aside only upon a showing that it was "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law." 5 U.S.C. § 706(2)(A) [5 USCS § 706(2)(A)]. See also *Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 375-376, 104 L. Ed. 2d 377, 109 S. Ct. 1851 (1989); *Kleppe v. Sierra Club*, 427 U.S. 390, 412, 49 L. Ed. 2d 576, 96 S. Ct. 2718 (1976). Here, FMCSA based its FONSI upon the analysis contained within its EA; respondents argue that the issuance of the FONSI was arbitrary and capricious because the EA's analysis was flawed. In particular, respondents criticize the EA's failure to take into account the various environmental effects caused by the increase in cross-border operations of Mexican motor carriers.

Under NEPA, an agency is required to provide an EIS only if it will be undertaking a "major Federal action," which "significantly affect[s] the quality of the human environment." 42 U.S.C. § 4332(2)(C) [42 USCS § 4332(2)(C)]. Under applicable CEQ regulations, "[m]ajor Federal action" is defined to "includ[e] [***77] actions with effects that may be major and which are potentially subject to Federal control and responsibility." 40 CFR § 1508.18 (2003). [***764] "Effects" is defined to "include: (a) Direct effects, which are caused by the action and occur at the same time and place," and "(b) Indirect effects, which are caused by the action and are later in time or farther removed in distance, but are still reasonably foreseeable." § 1508.8. Thus, the relevant question is whether the increase in cross-border operations of Mexican motor carriers, with the correlative release of emissions by Mexican trucks, is an "effect" of FMCSA's issuance of the Application and Safety Monitoring Rules; if not, FMCSA's failure to address these effects in its EA did not violate NEPA, and so FMCSA's issuance of a FONSI cannot be arbitrary and capricious.

A

[***LEdHR2C] [2C] [***LEdHR8A] [8A] [***LEdHR9] [9] To answer this question, we begin by explaining what this case does *not* involve. What is not properly before us, despite respondents' argument to the contrary, see Brief for Respondents 38-41, is any challenge to the EA due to its failure properly to consider possible alternatives to the proposed action (*i.e.*, the issuance of the challenged rules) that would mitigate the environmental impact of the authorization of cross-border operations by Mexican motor carriers. Persons challenging an agency's compliance with NEPA must "structure

their participation so that it . . . alerts the agency to the [parties'] position and contentions," in order to allow the agency to give the issue meaningful consideration. *Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 553, 55 L. Ed. 2d 460, 98 S. Ct. 1197 (1978). None of the respondents identified in their comments any rulemaking alternatives beyond those evaluated in the EA, and none urged FMCSA [****2214**] to consider alternatives. Because respondents did not raise these particular objections to the EA, FMCSA was not given the opportunity to examine any proposed alternatives to determine if they were reasonably available. Respondents have therefore forfeited any objection [***765**] to the EA on the ground that it failed adequately to discuss potential alternatives to the proposed action.

[*****LEdHR8B**] [8B] [*****LEdHR10**] [10] Admittedly, the agency bears the primary responsibility to ensure that it complies with NEPA, see *ibid.*, and an EA's or an EIS' flaws might be so obvious that there is no need for a commentator to point them out specifically in order to preserve its ability to challenge a proposed action. But that situation is not before us. With respect to FMCSA's ability to mitigate, respondents can argue only that FMCSA could regulate emissions from Mexican trucks indirectly, through making the safety-registration process more onerous or by removing older, more polluting trucks through more effective enforcement of motor carrier safety standards. But respondents fail to identify any evidence that shows that any effect from these possible actions would be significant, or even noticeable, for air-quality purposes. The connection between enforcement of motor carrier safety and the environmental harms alleged in this case is also tenuous at best. Nor is it clear that FMCSA could, consistent with its limited statutory mandates, reasonably impose on Mexican carriers standards beyond those already [*****78**] required in its proposed regulations.

B

[*****LEdHR2D**] [2D] With this point aside, respondents have only one complaint with respect to the EA: It did not take into account the environmental effects of increased cross-border operations of Mexican motor carriers. Respondents' argument that FMCSA was required to consider these effects is simple. Under § 350, FMCSA is barred from expending any funds to process or review any applications by Mexican motor carriers until FMCSA implemented a variety of specific application and safety-monitoring requirements for Mexican carriers. This expenditure bar makes it impossible for any Mexican motor carrier to receive authorization to operate within the United States until FMCSA issued the regulations chal-

lenged here. The promulgation of the regulations, [***766**] the argument goes, would "caus[e]" the entry of Mexican trucks (and hence also cause any emissions such trucks would produce), and the entry of the trucks is "reasonably foreseeable." 40 CFR § 1508.8 (2003). Thus, the argument concludes, under the relevant CEQ regulations, FMCSA must take these emissions into account in its EA when evaluating whether to produce an EIS.

[*****LEdHR1B**] [1B] [*****LEdHR2E**] [2E] [*****LEdHR4C**] [4C] Respondents' argument, however, overlooks a critical feature of this case: FMCSA has no ability to countermand the President's lifting of the moratorium or otherwise categorically to exclude Mexican motor carriers from operating within the United States. To be sure, § 350 did restrict the ability of FMCSA to authorize cross-border operations of Mexican motor carriers, but Congress did not otherwise modify FMCSA's statutory mandates. In particular, FMCSA remains subject to the mandate of 49 U.S.C. § 13902(a)(1), [49 USCS § 13902(a)(1)], that FMCSA "shall register a person to provide transportation . . . as a motor carrier if [it] finds that the person is willing and able to comply with" the safety and financial responsibility requirements established by the Department of Transportation. (Emphasis added.) Under FMCSA's entirely reasonable reading of this provision, it must certify *any* motor carrier that can show that it is willing and able to comply with the various substantive requirements for safety and financial [****2215**] responsibility contained in DOT regulations; only the moratorium prevented it from doing so for Mexican motor carriers before 2001. App. 51-55. Thus, upon the lifting of the moratorium, if FMCSA refused to authorize a Mexican motor carrier for cross-border services, where the Mexican motor carrier was willing and able to comply with the various substantive safety and financial responsibilities rules, it would violate § 13902(a)(1).

If it were truly impossible for FMCSA to comply with both § 350 and § 13902(a)(1), then we would be presented with an irreconcilable conflict of laws. As the later enacted provision, § 350 would quite possibly win out. See *Posadas v. National [*767] City Bank*, 296 U.S. 497, 503, 80 L. Ed. 351, 56 S. Ct. 349 (1936). But FMCSA can easily satisfy both mandates: It can issue the application and safety inspection rules required by § 350, and start processing applications by Mexican motor carriers and authorize those that satisfy § 13902(a)(1)'s conditions. Without a conflict, then, [*****79**] FMCSA must comply with all of its statutory mandates.

[*****LEdHR11A**] [11A] Respondents must rest, then, on a particularly unyielding variation of "but for" causation, where an agency's action is considered a cause of an environmental effect even when the agency has no

541 U.S. 752, *767; 124 S. Ct. 2204, **2215;
159 L. Ed. 2d 60, ***LEdHR11A; 2004 U.S. LEXIS 4027

authority to prevent the effect. However, a "but for" causal relationship is insufficient to make an agency responsible for a particular effect under NEPA and the relevant regulations. As this Court held in *Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 774, 75 L. Ed. 2d 534, 103 S. Ct. 1556 (1983), NEPA requires "a reasonably close causal relationship" between the environmental effect and the alleged cause. The Court analogized this requirement to the "familiar doctrine of proximate cause from tort law." *Ibid.* In particular, "courts must look to the underlying policies or legislative intent in order to draw a manageable line between those causal changes that may make an actor responsible for an effect and those that do not." *Id.*, at 774, n. 7, 75 L. Ed. 2d 534, 103 S. Ct. 1556. See also W. Keeton, D. Dobbs, R. Keeton, & D. Owen, *Prosser and Keeton on Law of Torts* 264, 274-275 (5th ed. 1984) (proximate cause analysis turns on policy considerations and considerations of the "legal responsibility" of actors).

[***LEdHR12] [12] Also, inherent in NEPA and its implementing regulations is a "rule of reason," which ensures that agencies determine whether and to what extent to prepare an EIS based on the usefulness of any new potential information to the decisionmaking process. See *Marsh*, 490 U.S., at 373-374, 104 L. Ed. 377, 109 S. Ct. 1851. Where the preparation of an EIS would serve "no purpose" in light of NEPA's regulatory scheme as a whole, no rule of reason worthy of that title would require an agency to prepare an EIS. See *Aberdeen & Rockfish R. Co. v. Students Challenging Regulatory Agency Procedures (SCRAP)*, 422 U.S. 289, 325, 45 L. Ed. 2d 191, 95 S. Ct. 2336 (1975); see also 40 CFR §§ 1500.1(b)-(c) (2003).

[***LEdHR2F] [2F] [***LEdHR4D] [4D] [***LEdHR13A] [13A] In these circumstances, the underlying policies behind NEPA and Congress' intent, as informed by the "rule of reason," make clear that the causal connection between FMCSA's issuance of the proposed regulations and the entry of the Mexican trucks is insufficient to make FMCSA responsible under NEPA to consider the environmental effects of the entry. The NEPA EIS requirement serves two purposes. First, "[i]t ensures that the agency, in reaching its decision, will have available, and will carefully consider, detailed information concerning significant environmental impacts." *Robertson*, 490 U.S., at 349, 104 L. Ed. 2d 351, 109 S. Ct. 1835. Second, it "guarantees [**2216] that the relevant information will be made available to the larger audience that may also play a role in both the decisionmaking process and the implementation of that decision." *Ibid.* Requiring FMCSA to consider the environmental effects of the entry of Mexican trucks would fulfil neither of these statutory purposes. Since FMCSA has no ability categor-

ically to prevent the cross-border operations of Mexican motor carriers, the environmental impact of the cross-border operations would have no effect on FMCSA's decisionmaking—FMCSA simply lacks the power to act on whatever information might be contained in the EIS.

[***LEdHR2G] [2G] [***LEdHR13B] [13B] Similarly, the informational purpose is not served. The "informational [***80] role" of an EIS is to "giv[e] the public the assurance that the agency 'has indeed considered environmental concerns in its decisionmaking process,' *Baltimore Gas & Electric Co. [v. Natural Resources Defense Council, Inc.]*, 462 U.S. 87, 97, 76 L. Ed. 2d 437, 103 S. Ct. 2246 (1983)], and, perhaps more significantly, provid[e] a springboard for public comment" in the agency decisionmaking process itself, *ibid.* The purpose here is to ensure that the "larger audience," *ibid.*, can provide input as necessary to the agency making the relevant decisions. See 40 CFR § 1500.1(c) (2003) ("NEPA's purpose is not to generate paperwork—even excellent paperwork—but to foster excellent [*769] action. The NEPA process is intended to help public officials make decisions that are based on understanding of environmental consequences, and take actions that protect, restore, and enhance the environment"); § 1502.1 ("The primary purpose of an environmental impact statement is to serve as an action-forcing device to insure that the policies and goals defined in the Act are infused into the ongoing programs and actions of the Federal Government"). But here, the "larger audience" can have no impact on FMCSA's decisionmaking, since, as just noted, FMCSA simply could not act on whatever input this "larger audience" could provide. n2

[***LEdHR2H] [2H]

n2 Respondents are left with arguing that an EIS would be useful for informational purposes entirely outside FMCSA's decisionmaking process. See Brief for Respondents 42. But such an argument overlooks NEPA's core focus on improving agency decisionmaking. See 40 CFR §§ 1500.1, 1500.2, 1502.1 (2003).

It would not, therefore, satisfy NEPA's "rule of reason" to require an agency to prepare a full EIS due to the environmental impact of an action it could not refuse to perform. Put another way, the legally relevant cause of the entry of the Mexican trucks is *not* FMCSA's action, but instead the actions of the President in lifting the moratorium and those of Congress in granting the President this authority while simultaneously limiting FMCSA's discretion.

[***LEdHR2I] [2I] Consideration of the CEQ's

"cumulative impact" regulation does not change this analysis. An agency is required to evaluate the "[c]umulative impact" of its action, which is defined as "the impact on the environment which results from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions." § 1508.7. The "cumulative impact" regulation required FMCSA to consider the "incremental impact" of the safety rules themselves, in the context of the President's lifting of the moratorium [*770] and other relevant circumstances. But this is exactly what FMCSA did in its EA. FMCSA appropriately and reasonably examined the incremental impact of its safety rules assuming the President's modification of the moratorium [**2217] (and, hence, assuming the increase in cross-border operations of Mexican motor carriers). The "cumulative impact" regulation does not require FMCSA to treat the lifting of the moratorium itself, or consequences from the lifting of the moratorium, as an effect of its promulgation [***81] of its Application and Safety Monitoring Rules. n3

[***LEdHR2J] [2J]

n3 The Court of Appeals and respondents contend that the EA contained numerous other errors, but their contentions are premised on the conclusion that FMCSA was required to take into account the increased cross-border operations of Mexican motor carriers.

C

[***LEdHR1C] [1C] [***LEdHR2K] [2K]
[***LEdHR4E] [4E] [***LEdHR11B] [11B]
[***LEdHR14A] [14A] [***LEdHR15A] [15A] We hold that where an agency has no ability to prevent a certain effect due to its limited statutory authority over the relevant actions, the agency cannot be considered a legally relevant "cause" of the effect. Hence, under NEPA and the implementing CEQ regulations, the agency need not consider these effects in its EA when determining whether its action is a "major Federal action." Because the President, not FMCSA, could authorize (or not authorize) cross-border operations from Mexican motor carriers, and because FMCSA has no discretion to prevent the entry of Mexican trucks, its EA did not need to consider the environmental effects arising from the entry. n4

[***LEdHR14B] [14B] [***LEdHR15B]
[15B]

n4 Respondents argue that Congress ratified the Court of Appeals' decision when it, after the lower

court's opinion, reenacted § 350 in two appropriations bills. The doctrine of ratification states that "Congress is presumed to be aware of [a] . . . judicial interpretation of a statute and to adopt that interpretation when it re-enacts a statute without change." *Lorillard v. Pons*, 434 U.S. 575, 580, 55 L. Ed. 2d 40, 98 S. Ct. 866 (1978). But this case involves the interpretation of NEPA and the CAA, not § 350. Indeed, the precise requirements of § 350 were not below, and are not here, in dispute. Hence, congressional reenactment of § 350 tells us nothing about Congress' view as to the requirements of NEPA and the CAA, and so, on the legal issues involved in this case, Congress has been entirely silent.

[*771] III

[***LEdHR3B] [3B] [***LEdHR16] [16] Under the CAA, a federal "department, agency, or instrumentality" may not, generally, "engage in, support in any way or provide financial assistance for, license or permit, or approve, any activity" that violates an applicable State air-quality implementation plan. 42 U.S.C. § 7506(c)(1) [42 USCS § 7506(c)(1)]; 40 CFR § 93.150 (2003). Federal agencies must, in many circumstances, undertake a conformity determination with respect to a proposed action, to ensure that the action is consistent with § 7506(c)(1). See 40 CFR §§ 93.150(b), 93.153(a)-(b). However, an agency is exempt from the general conformity determination under the CAA if its action would not cause new emissions to exceed certain threshold emission rates set forth in § 93.153(b). FMCSA determined that its proposed regulations would not cause emissions to exceed the relevant threshold amounts and therefore concluded that the issuance of its regulations would comply with the CAA. App. to Pet. for Cert. 65a-66a, 155a. Critical to its calculations was its consideration of only those emissions that would occur from the increased roadside inspections of Mexican trucks; like its NEPA analysis, FMCSA's CAA analysis did not consider any emissions attributable to the increased presence of Mexican trucks within the United States.

EPA's rules provide that "a conformity determination is required for each pollutant where the total of direct and indirect emissions in a nonattainment or maintenance area caused by a Federal action would equal or exceed" the threshold levels established by the EPA. 40 CFR § 93.153(b). "Direct emissions" are defined as those covered emissions [***82] "that are [**2218] caused or initiated by the Federal action and occur at the same time and place as the [*772] action." § 93.152. The term "indirect emissions" means covered emissions that

541 U.S. 752, *772; 124 S. Ct. 2204, **2218;
159 L. Ed. 2d 60, ***82; 2004 U.S. LEXIS 4027

"(1) Are caused by the Federal action, but may occur later in time and/or may be further removed in distance from the action itself but are still reasonably foreseeable; and (2) The Federal agency can practicably control and will maintain control over due to a continuing program responsibility of the Federal agency." *Ibid.*

Unlike the regulations implementing NEPA, the EPA's CAA regulations have defined the term "[c]aused by." *Ibid.* In particular, emissions are "[c]aused by" a Federal action if the "emissions . . . would not . . . occur in the absence of the Federal action." *Ibid.* Thus, the EPA has made clear that for purposes of evaluating causation in the conformity review process, some sort of "but for" causation is sufficient.

[***LEdHR3C] [3C] Although arguably FMCSA's proposed regulations would be "but for" causes of the entry of Mexican trucks into the United States, the emissions from these trucks are neither "direct" nor "indirect" emissions. First, the emissions from the Mexican trucks are not "direct" because they will not occur at the same time or at the same place as the promulgation of the regulations.

[***LEdHR3D] [3D] [***LEdHR4F] [4F] Second, FMCSA cannot practicably control, nor will it maintain control, over these emissions. As discussed above, FMCSA does not have the ability to countermand the President's decision to lift the moratorium, nor could it act categorically to prevent Mexican carriers from being registered or Mexican trucks from entering the United States. Once the regulations are promulgated, FMCSA would have no ability to regulate any aspect of vehicle exhaust from these Mexican trucks. FMCSA could not refuse to register Mexican motor carriers simply on the ground that their trucks would pollute excessively. FMCSA cannot determine [*773] whether registered carriers actually will bring trucks into the United States, cannot control the routes the carriers take, and cannot determine what the trucks will emit. Any reduction in emissions that would occur at the hands of FMCSA would be mere happenstance. It cannot be said that FMCSA "practicably control[s]" or "will maintain control" over the vehicle emissions from the Mexican trucks, and it follows that the emissions from the Mexican trucks are not "indirect emissions." *Ibid.*; see also Determining Conformity of General Federal Actions to State or Federal Implementation Plans, 58 Fed. Reg. 63214, 63221 (1993) ("The EPA does not believe that Congress intended to extend the prohibitions and responsibilities to cases where, although licensing or approving action is a required initial step for a subsequent activity that causes emissions, the agency has no control over that subsequent activity").

[***LEdHR1D] [1D] [***LEdHR3E] [3E] The emissions from the Mexican trucks are neither "direct" nor "indirect" emissions caused by the issuance of FMCSA's proposed regulations. Thus, FMCSA did not violate the CAA or the applicable regulations by failing to consider them when it evaluated whether it needed to perform a full "conformity determination."

[***83] IV

[***LEdHR1E] [1E] [***LEdHR2L] [2L] [***LEdHR3F] [3F] FMCSA did not violate NEPA or the relevant CEQ regulations when it did not consider the environmental effect of the increase in cross-border operations of Mexican motor carriers in its EA. Nor did FMCSA act improperly by not performing, pursuant to the CAA and relevant regulations, a full conformity review analysis for its proposed regulations. We therefore reject respondents' challenge to the procedures [***2219] used in promulgating these regulations. Accordingly, the judgment of the Court of Appeals is reversed, and the case is remanded for further proceedings consistent with this opinion.

It is so ordered.
