

## Script of “How to Install EPS-HDT” Video

Welcome to EPS-HDT. In this video we describe how to install the EPS-HDT Excel Add-Ins.

EPS-HDT is free and easy to use. It produces detailed socioeconomic reports of counties, states, and regions for any part of the nation.

Make sure to close Excel before you begin the installation process.

To download the software, go to [HeadwatersEconomics.org](http://HeadwatersEconomics.org) and click on the SOCIOECONOMIC PROFILES link in the upper right side of your browser window. This webpage allows you to access the EPS-HDT support pages which include documentation of methods, contact information, and other videos that describe how to create and use the EPS-HDT reports.

Click the DOWNLOAD link in the upper right side of your browser window. Then fill in the first time only registration including your email address, your zip code, and your occupation. Click the DOWNLOAD link in the center of your browser window. On the webpage that opens, click the CLICK HERE link to download the EPS-HDT application. If you’re using Internet Explorer, the application installer will automatically begin. If you’re using another browser, a file called “epshdt.application” will download. You’ll need to double click on this file to begin the installation process.

When you’re prompted, click YES to continue. A window will open indicating that the Add-Ins was successfully installed. Click OK.

When you next open Excel, click the Add-Ins tab across the top of Excel to show the EPS-HDT drop down menu. Now, the Add-Ins will be available for you to use whenever you open Excel.

Thank you and visit the EPS-HDT support pages for other resources, including a video that describes how to use the Add-Ins to generate reports.
