

AFMSS 2 Patch Release Summary

November 1, 2016

A patch release was deployed November 1, 2016.

Please clear your cache to pick up all changes made.

The Release includes:

- JIRA: 821 (BLM)
 - o A 4,000 character limit has been added for all *electronic APD* reviews: adjudication, engineering, geology, surface, and prepare & conduct onsite
- JIRA: 825 (Operator)
 - o System will no longer allow user to enter all 0's in the Private Ownership Telephone Number field. This applies to NOS's and is validated to prevent Blank NOS Forms and Errors.
- JIRA: 833 (Operator)
 - o The Drop down list for field office selection has been updated to show active offices including those that have been consolidated.
- JIRA: 848 (Operator & BLM)
 - o Surface Use Plan Data Report has been fixed and will display properly.
- JIRA: 842 (BLM)
 - o User has the ability to select the correct USFS region/grassland/district in the Surface Owner section of the paper APD.
- JIRA: 841 (Operator & BLM)
 - o The system will allow text and file attachments and will display properly in the APD Print Report
- JIRA: 832 (Operator)
 - o The edit button on Section 4 table of the SUPO corrected.
- JIRA: 836 (BLM)
 - o The attachment buttons on the Paper NOS were realigned.
- JIRA: 834 (Operator)
 - o System no longer requires the following fields when validated. These fields are optional. Existing Vegetation at the well pad, Existing Vegetation Community at the road, Existing Vegetation Community at the pipeline, and Existing Vegetation Community at other disturbances.
