## (BLM/Operator)-AFMSS-1179/1296 Bug: Update Track Changes Links to Display New Report

The "Track Changes" link accessible from the well header and My Monitor now loads the new version of the track changes report.

Track Changes Link and Report Name

The screenshot displays the AFMSS interface. On the left, a well header box contains the following information:

AFMSS II APD #	10400022914
Designated Agent	N
Well Type	CONVENTIONAL GAS WELL
Federal/Indian APD	FED

Below the header, there are two links: [APD Attachments](#) and [Track Changes](#). The [Track Changes](#) link is highlighted in yellow. On the right, the "Track Changes Full History Report" is displayed. The report header includes the title "Track Changes Full History Report" and the text "Data refreshed Nov 22, 2017 at 1:31:47 PM". Below the header, there are navigation icons (save, print, back, forward, refresh, and list) and the AFMSS logo with the text "U.S. Department of the Interior BUREAU OF LAND MANAGEMENT".

## (BLM/Operator) AFMSS-1184 Bug:Track Changes "Sections Revised" Not Listing All Revised Areas of the APD

When a change is made to an APD, the track changes report will only show the revised area in a given revision cycle.

## (BLM) AFMSS-1205: Add Resource Area Field to the Review APD task for Adjudicators

The first task in the APD workflow, Review APD, has a new required field called Resource Area. This is AFMSS 1 functionality that needed to be added to the APD process to capture the resource area for that APD before it is abstracted from AFMSS 2 to AFMSS 1. This information is needed for reporting.

Users will select the resource area from a drop down if more than one exists for that field office.

Activity - Review APD in APD Process

AFMSS II APD #	10400022914	Pay.gov Tracking ID:	123	APD Submitted	11/21/2017
Designated Agent	N	Operator	QEP ENERGY	Well Number	01234567890123456789KKKKKKKKKKLLLLLLLLLLLLLOOOO
Well Type	CONVENTIONAL GAS	Well Name	CORA WELL NAME	Work Type	Drill
Federal/Indian APD	<input checked="" type="checkbox"/> FEDERAL <input type="checkbox"/> INDIAN	Well Class	VERTICAL

--------------	----------	----------------	--------	---------------	---------	----------------------	---------------------------

## (BLM/Operator)-AFMSS-1244: Update Well Number Field to Accept 45 Characters

The Well Number field in AFMSS 2 allows users to enter up to 45 characters and reports were adjusted to display the longer field.

## (BLM/Operator)-AFMSS-1252 Bug:Track Changes Report Adding Changes to Drilling Plan Section 4

After creating a new APD from scratch (not a cloned APD), the BLM returns it and the operator resubmits the APD with revisions: the track changes report was recognizing those changes, but also adding revisions/ changes in the Drilling Plan section that were not made by the operator, mainly in these areas listed below. This ticket resolved the issue.

- \* Stage Tool Depth
- \* Lead Top MD of Segment
- \* Lead Density
- \* Lead Bottom MD Segment
- \* Lead Quantity
- \* Lead Volume
- \* Lead Cement Type
- \* Lead Yield
- \* Tail Top MD of Segment
- \* Tail Additives
- \* Tail Density
- \* Tail Bottom MD Segment
- \* Tail Quantity
- \* Tail Volume
- \* Tail Cement Type
- \* Tail Yield
- \* Tail Percent Excess

### (BLM/Operator)-AFMSS-1293 Bug: Tie To NOS Information Missing in Track Changes Report

When re-submitting an APD and changing the answer to “Tie to Previous NOS”, the track changes report was not originally picking up the change to this question. This fix will now have the report display the NOS ID number if the answer to the question is Yes and will appear blank if the answer is either No or is left unanswered. To reiterate, the actual answer of “Yes” or “No” will not display on the report.

Tie to previous NOS?  Yes  No

Select the NOS to Copy  
10400004222 ▼

Select the Copy Option:

- Copy ALL data from selected NOS
- Copy ALL data from selected NOS except the well location data
- Copy ALL data from selected NOS except attachments
- Copy ALL data from selected NOS except attachments and well location data

Copy NOS

### (BLM/Operator)-AFMSS-1294 Bug: Revision 1 Possibly Missing in Track Changes Report

It was discovered that the track changes report was not recognizing a revision when it was strictly an attachment which was causing a skip in the revision listings. For example: an APD has been through two rounds of revisions but only the second is recorded and this is incorrect. At this time the work around is to always check the revisions AND the last page of the report of any attachment changes.

APD ID: 10400021610

## (BLM/Operator) Bizflow version upgrade to 12.5

Bizflow was upgraded to 12.5 to address the Apache Struts vulnerability, and to incorporate any new fixes available from the software provider.
