# Production Release Summary for AFMSS 2
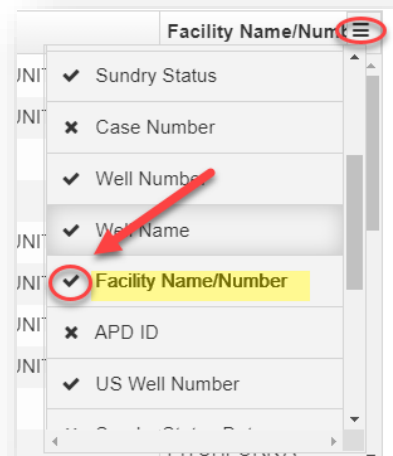

Released August 16, 2021

This deployment contains bug fixes and updates. Please see the following updates below. During this last week performance queries were optimized for search screens and worklists generation.

PROD-4174 – Well Finder Filters on Well Status (BLM & Operator) The Well Finder search filter for well status is reinstated to provide additional search criteria for wells.

PROD-4363 – Sundry Finder Displays Facility Name/Number (BLM & Operator) The Sundry Finder will now display the Facility Name/Number when searching if there is one associated when the Facility Name/Number option is selected from the Tri-Bar or More Menu.

PROD-4076 – Notice of Intent Sundry Surface Disturbance Accordion Allowing Decimals for Surface Disturbance Acreage (BLM & Operator) The Surface Disturbance Accordion will now allow decimals to be entered in the Surface disturbance acreage. The entry will no longer round the answer and will retain the decimal value.

PROD-4252 – Notice of Staking (NOS) Not Displaying in the Worklist (Operator)
The operator's NOS drafts will appear in the operator's worklist until submitted by the operator.

PROD-4130 – APD Monitors Worklists and My APD Worklists Populating Results on Search Criteria for Approval/COA Specialists Tasks (BLM & Operator)
The Worklists will now sort when selecting Pending Task dropdown for the Approval/COAs Tasks for specialists.

PROD-4478 – Sundry Print Report Loads and Opens Correctly (BLM & Operator)
The Sundry Print Report link will generate the Sundry Print Report from the header of the sundry, the sundry header in the monitor, and the Sundry Finder Print option from the Actions menu.

PROD-4414 – Global Bond Search Updated to Yield Up To 500 Results (BLM)
The BLM will be able to search in the Bonds screen with a yield of up to 500 results.
